Special Issue on Technology and Management

Guest Editors: Professor Kai-I Huang, Tunghai University, Taiwan
Professor Chun-Yao Tseng, Tunghai University, Taiwan

Objectives

This special issue of International Journal of Electronic Business Management (IJEEM) will focus on the topic of interactions between technology and management. The interconnection between management and technology disciplines is unavoidably in the knowledge economy. This issue will offer a remarkable contribution to manage the technological futures and utilize technology to improve management, based on cross discipline knowledge transfer and integration. Each article will be reviewed by world-renowned experts in the field. The IJEEM is currently indexed and abstracted in the EI Journal Index (EI Engineering Village 2), Cabell's Directory, INSPEC Database, ISWorld Publications Database and EBSCO Database.

Scope

This special issue aims at timely dissemination of research in these areas. Possible topics include, but are not limited to:

- Technology and Innovation Management
- Knowledge Management
- Supply Chain Management
- Information Technology and Management
- Science Technology and Society
- Green Energy Technology and Management
- E-Marketing Management
- Technology Applications in management Education
- Other Related Issues on Technology and Management
